Comment	<p>Thank you for the opportunity to comment on Agenda Item 3A of the September 5, 2018 Board meeting.</p> <p>The majority of Nevada voters want the State to continue to partner with local non-profits to protect the Virginia Range mustangs, which are part of the history and culture of Northern Nevada. I urge you to work with the network of local organizations who have submitted a proposal for moving forward with the humane management cooperative agreement.</p> <p>The NDAs cancellation of the Cooperative Agreements has left the Virginia Range horse population with no control on growth which will negatively impact public safety and the health of the horses and their habitat. The proposed management program for the Virginia Range horses that involves "removal," "culling," "castration" and the use of an unproven vaccine called GonaCon is NOT supported by science nor by the public. Humane fertility control provided by a team of certified darters using the scientifically proven porcine zona pellucida (PZP) can be immediately restarted at no cost to Nevada taxpayers.</p> <p>Please take steps to re-implement community based cooperative agreements for the humane management and protection of the historic and cherished Virginia Range horses.</p> <p>Respectfully</p>

Email "Board of Agriculture Public Comment" originally sent to [boapubliccomment@agri.nv.gov](mailto:boapubliccomment@agri.nv.gov) from [boapubliccomment@agri.nv.gov](mailto:boapubliccomment@agri.nv.gov) on 9/2/2018 5:44:05 PM.

My name is Nancy Kilian. I am a certified trained darter and in 26 months under the cooperative agreement I have shot 386 darts with the PZP vaccine to mares in the Virginia range. In 2017 our darters had prevented at least 146 mares from producing a foal. This year 2018, in the Virginia City Highlands, where I do most of my darting, we only have 18 foals out of 142 females. I am requesting that a short term, interim contract be put in place immediately to allow for resumption of the birth control program. The most successful program in the country. This would be managed by local horse advocacy groups. There are 12 local groups who support humane birth control with PZP. With the addition of 3-5 darters we should be able to dart close to 500 mares and with an efficacy rate of 90-93% should prevent at least 450 foals in 2020. Unfortunately, we were unable to dart in 2018 which has left the majority of mares being pregnant this year and foaling in 2019.

- We have Certified trained darters
- VRWPA has insurance as well as WHPL and Wild horse connection that covers the darters and people documenting
- We have the PZP and adjuvant
- We have CO2 guns and darts
- We have a data base to identify over 3000 horses documented, each with pictures, what band they are in, detailed descriptions, darting records and specific events of the horses
- There is no cost to the NDA or the tax payers, this would all be funded by donations.

So please consider resuming the birth control program, there really is no downside but a huge upside: preventing hundreds of foal births.
