

NEVADA FOOD AND AGRICULTURE TRADE REPORT

2022- Q1

The Nevada Department of Agriculture (NDA) works with key trade partners, stakeholders and policy makers to ensure that the food and agriculture sector continues to see economic growth. To ensure that industry and partners are up-to-date, the NDA issues quarterly trade reports in addition to the in-depth biennium report. For any questions related to trade or economic development within the food and agriculture sector, please contact NVtrade@agri.nv.gov. All data is from the U.S. Census Bureau, USA Trade® Online. Inflation is adjusted using U.S. Bureau of Labor Statistics Consumer Price Index Inflation Calculator for each previous year to 2022.

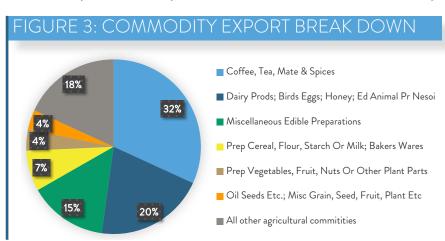

During the first quarter (Q1) of 2021 (January-March), Nevada's food and agriculture exports were strong, totaling \$94 million. While this quarter was slightly lower than Q1 of 2021 (12% decrease), exports were higher than the historic export average for Q1 in 2016-2021 (\$85.7 million). Trade with Canada was elevated in Q1

2022 compared to 2021 due to increased sales of live animals, prep vegetables and beverages, making them the top trading partner this quarter.

Coffee, tea, and spices (\$30 million) and dairy products (\$19 million) remained Nevada's top exported commodities this quarter. The largest increase from Q4 (2021) to Q1 (2022) was seen in coffee, tea, and spices (up \$7.1 million) while the largest decrease was seen in food industry residues (down \$973,520).
