

2019 Industrial Hemp Seed Producer Certificate Holders Plant Industry

The NDA does not promote the use of select hemp seed producers. This list illustrates which producers have been certified within the state and have been deemed eligible for industrial hemp seed production in 2019. The NDA does not endorse the use of one producer over the other and will not recommend producers or varieties for growers. This list in no way declares that each seed producer will stock varieties that maintain a THC concentration of <0.3%.

When arranging a purchase, certified industrial hemp seed producers are required to verify that the purchasing party holds a valid industrial hemp grower's or handler's certificate prior to completing a transaction. Seed producers are also mandated to maintain chain of custody pursuant to each transaction, documenting the buyer, certificate number, date of transaction, quantity of seed, and varieties exchanged. Records are subject to NDA inspection upon request.

All seed is subject to the requirements set forth within Nevada Revised Statute Chapter 587, Nevada Administrative Code Chapter 587 and the Federal Seed Act. All companies/individuals who sell and/or label industrial hemp seed in NV must be certified to do so. All seed entered into commercial sale must have the appropriate testing and labeling conducted prior to a sale occurring. The following information must be listed on an agricultural seed label:

- 1) The name or kind of seed present; (i.e. Industrial Hemp);
- 2) The variety name or the letters VNS (variety not stated);
- 3) A lot number;
- 4) Origin (State);
- 5) Percentage by weight of all weed seeds;
- 6) The name and rate of occurrence of all restricted noxious weed seeds;
- 7) Percentage by weight of inert matter;
- 8) Percentage of germination, exclusive of hard or dormant seed;
- 9) Percentage of hard or dormant seeds, if present;
- 10) The calendar month and year that the test was completed to determine germination percentages.
