

**Retail Nursery Provisions for the Intra Quarantine Movement
of Regulated Retail Nursery Stock under the Asian Citrus Psyllid
and Citrus Greening Quarantine**
Plant Industry Division

Compliance Number: ___ACP_____

(To be completed by the NDA)

- A. Establishment shall not move regulated articles out of the area quarantined for Asian citrus psyllid (ACP) and Citrus greening (CG).**
- B. Establishment shall only move regulated articles within the area quarantined for ACP and CG when complying with *all* of the following:**

1. Treatment for ACP

Establishment shall ensure all regulated articles are treated with an approved treatment (See [NDA Approved Treatment Protocol for Intra Quarantine Movement of Regulated Nursery Stock](#)) in a manner specified below:

- a. Obtain plants already treated at production nurseries. Each treated plant must be received with tag or label designating where the plant came from and the treatment the plant received and date of treatment. *or*
- b. An initial treatment consisting of a foliar treatment *and* a drench treatment with an approved product. A list of approved products will be supplied by the Nevada Dept. of Agriculture(NDA).
 - 1) After treatment, a *yellow* tree tag must be affixed to each individual tree/plant. Each individual tree tag must include:
 - i. The statement: “This plant shall **not be moved** out of the area quarantined for Asian citrus psyllid.”
 - ii. A sequential tag number
 - iii. Name and address of the issuing nursery
 - iv. Compliance agreement number of the issuing nursery *and*
 - c. *after 90 days from last treatment all regulated stock must be retreated, according to NDA Approved Treatment Protocol for Intra Quarantine Movement of Regulated Nursery Stock, and retagged as in b. above.*
- 2) Documentation of each treatment must contain the following information: date, product used (foliar and drench), number and type of each plant treated, tag number issued to each plant. An example treatment log is found on page 2.

**Retail Nursery Provisions for the Intra Quarantine Movement
of Regulated Retail Nursery Stock under the Asian Citrus Psyllid
and Citrus Greening Quarantine**
Plant Industry Division

3) Treatment documentation records must be retained on the premise for as long as the treated plants remain on site and for a period of at least two years after the plant is no longer on site.

2. Inspection

Establishment shall allow the NDA to perform random inspections to ensure freedom from ACP and CG to verify compliance with this Agreement.

3. Tags for Regulated Articles

Establishment shall ensure that each regulated article has an affixed tree tag attesting that the plant shall not be moved from the area quarantined for ACP and CG.

Example of Tag:

This plant is subject to the NDA Asian Citrus Psyllid and Citrus Greening Quarantine and shall not be moved out of Clark County, Nevada.

4. Infested Nursery Stock

If the nursery or any plant within the nursery is found to be infested with ACP or CG, Establishment shall immediately notify the NDA and not move any regulated articles from the Establishment until such time as the NDA can determine that the nursery is free from ACP and CG.
