A REGULATION relating to hemp; establishing provisions relating to the registration of growers, handlers and producers; setting forth certain reporting requirements for registrants; establishing provisions relating to the sampling and testing of hemp; setting forth certain requirements for the disposal of noncompliant crops; establishing provisions relating to persons who commit certain violations relating to the regulation of hemp; establishing fees for registration as a grower, handler or producer; imposing civil penalties; repealing certain obsolete provisions; and providing other matters properly relating thereto.

Legislative Counsel’s Digest:

Existing law provides for the growth of hemp and the production of agricultural hemp seed in this State by persons registered with the State Department of Agriculture. (Chapter 557 of NRS) Existing federal law authorizes the production of hemp under the primary jurisdiction of a state or tribal government if the state or tribal government submits a plan to the United States Secretary of Agriculture that satisfies certain requirements. (7 U.S.C. § 1639p) Existing federal regulations set forth requirements for such a plan. (7 C.F.R. Part 990) This regulation establishes certain provisions relating to the growth and handling of hemp and production of agricultural hemp seed in this State in order to comply with the requirements set forth in federal law and regulations.

Existing federal regulations require a state plan for the production of hemp to include provisions prohibiting, with certain exceptions, certain persons who have been convicted of a felony related to a controlled substance from producing hemp for a 10-year period. (7 C.F.R. § 990.6) **Section 7** of this regulation sets forth certain requirements for registration as a grower, handler or producer. Among these requirements is that the application be accompanied by a background check of the applicant or, if the applicant is a business entity, each key participant as defined in **section 4** of this regulation. **Sections 7 and 8** of this regulation prohibit, with certain

exceptions, a person from obtaining a registration as a grower, handler or producer if the person has been convicted of a felony related to a controlled substance within the previous 10 years.

Existing federal regulations require a state plan to provide for the reporting of certain information relating to the production of hemp to the United States Department of Agriculture. (7 C.F.R. § 990.3) Existing federal regulations further require a state with an approved plan to report certain violations to certain governmental entities. (7 C.F.R. § 990.6) **Section 9** of this regulation requires each registrant to submit reports containing certain information to the State Department of Agriculture and the Farm Service Agency of the United States Department of Agriculture. **Section 15** of this regulation authorizes the Department to share certain information with any governmental entity as necessary to comply with federal regulations.

Existing federal regulations require a state plan to include certain procedures for: (1) the conducting of inspections; (2) the accurate and effective sampling of all hemp produced; and (3) testing that is able to accurately identify whether a sample of hemp contains a THC level that exceeds the acceptable hemp THC level, as defined by federal law. Existing federal regulations also set forth specific procedures for the sampling and testing of hemp. (7 C.F.R. § 990.3) **Section 10** of this regulation authorizes the Department to inspect, sample and analyze all plants of a registrant and all land, buildings and other structures used for growing, cultivating or storing hemp. **Section 11** of this regulation requires the Department to perform preharvest sampling and testing of all crop varieties. **Sections 11 and 12** of this regulation set forth requirements for sampling and testing, including, among other requirements, that such sampling and testing be performed using procedures that comply with federal regulations.

Existing federal regulations require a state plan to include certain procedures for the disposal of plants that exceed the acceptable THC level for hemp. (7 C.F.R. § 990.3) Under existing law, if an analysis of a growing crop in the field reveals that the crop contains a THC level that exceeds the maximum THC concentration level for hemp, the grower is required to submit a plan for the effective disposal of the crop to the Department for its approval. (NRS 557.240) **Section 13** of this regulation requires the state plan to comply with federal regulations. **Section 13** further authorizes the Department to order the destruction of any plants of a registrant if the Department determines that a sample of hemp, whether growing or harvested, exceeds the acceptable hemp THC level.

Existing federal regulations require a state plan to establish certain provisions relating to negligent violations committed by a producer of hemp. (7 C.F.R. § 990.6) **Section 14** of this regulation requires the Department to establish a corrective action plan for any registrant who commits a violation that would constitute a negligent violation under federal regulations. **Section 14** also provides for the revocation of the registration of a registrant who commits three negligent violations within a 5-year period. Under **section 14**, such a registrant is ineligible for registration for a period of 5 years after the date of the third violation. **Section 17** of this regulation establishes civil penalties for certain violations of the provisions governing hemp.

Sections 16 and 19 of this regulation establish certain fees relating to the growing and handling of hemp and the production of agricultural hemp seed. **Section 20** of this regulation repeals certain regulations relating to a program for the growth and cultivation of industrial hemp for research purposes, which was repealed by Senate Bill No. 347 of the 80th Session of the

Nevada Legislature. (Section 22 of Senate Bill No. 347, chapter 414, Statutes of Nevada 2019, at page 2593)
