PROPOSAL REQUIREMENTS

Proposals will be scored and awarded on a competitive basis.⁵ Projects may be funded fully, partially or not funded at all based on scoring committee decision. ***All of the following must be included in the proposal.***

¹Forest Land – forest land at least 10% stocked, or currently nonstocked but formerly having such stocking, with timber and/or woodland trees, and where human activity on the site does not preclude natural succession of the forest (i.e. the site can be naturally or artificially regenerated).

² Timberland – forest land where timber species constitute at least 5% crown cover; or forest land with sufficient timber species reproduction (minimum of 40 saplings and/or established seedlings per acre). Timber species can be of any size and includes all species of conifers (except junipers and yew) and aspen, cottonwood, and paper birch hardwood species.

³ Woodland – forest land with at least 10% crown cover in woodland trees; forest land with timber species and woodland species but less than 5% crown cover in timber species; forest land with sufficient woodland tree species reproduction (with the same reproduction criteria as timberland above). A woodland species can be classified as either a shrub or a tree and includes juniper, yew, mountain-mahogany, Rocky Mountain maple, and bigtooth maple.
