

Noxious Weed Management Plan

Minimal Checklist – NDOT Construction

Designed to meet the minimum standards set by Special Provision 637.01.04. The measures outlined reflect the contractor's commitment to noxious weed management and are implemented for the duration of the project.

Noxious Weed Survey

- Record the survey date.
- Identify noxious species present.
- Document affected project areas.
- Map infestation size and distribution.
- Include images of impacted areas.

Control Measures

- Specify appropriate control methods for identified species.
- Align weed management efforts with construction activities.
- Outline the timing and frequency of control efforts.

Prevention Strategies

- Clean equipment when leaving noxious weed-infested areas.
- Avoid contact in areas impacted by noxious weeds outside the project scope.
- Topsoil may not be salvaged when originating from an infested area.

Compliance & Reporting

- Submit herbicide treatment records to the Resident Engineer within 30 days.
- Maintain documentation of monitoring and control actions.
- Ensure personnel comply with the Noxious Weed Management Plan.
