Complete the form in its entirety to request an inspection, report harvest, or report crop(s) that will not be harvested. **All approved hemp producers must submit a report regardless of whether the crop will be harvested or sold.** If the crop failed or was not planted this still must be reported on this form per NAC 557. Failure to meet this requirement will result in a notice of non-compliance which can impact certification status and future recertification. Incomplete and/or illegible forms will be returned. Hemp crop(s) must be sampled/inspected by the NDA a minimum of **30 days prior to harvest.** Notification of 45 days prior to intended harvest is ideal for efficient sample inspection scheduling, which can reduce total inspection costs by allowing grouped inspections to split the travel expenses.

Crops may be harvested after it has been sampled by the Nevada Department of Agriculture (NDA). **Harvested crops must not be moved from the storage area indicated on this form** and cannot be re-sampled if the crop tests above compliance. **Do not dispose or relocate any crop material prior to NDA approval.** Once NDA lab analysis has resulted in Total THC concentrations below the federally mandated threshold (0.3% Total THC on a dry weight basis using a post-decarboxylated or similarly reliable method), harvested material can be moved.
